ISSPRO Hourmeter Instructions

Connecting Meter and Pressure Switch:

For battery equipped systems with magneto ignition, connect one wire to any convenient point on the engine or vehicle frame. Connect the other wire to either terminal of ISSPRO's Pressure Switch. Connect the other lead of the pressure switch to the hot side of the ammeter, generator, or battery. For pressure switch installation, refer to the instructions with the ISSPRO switch.

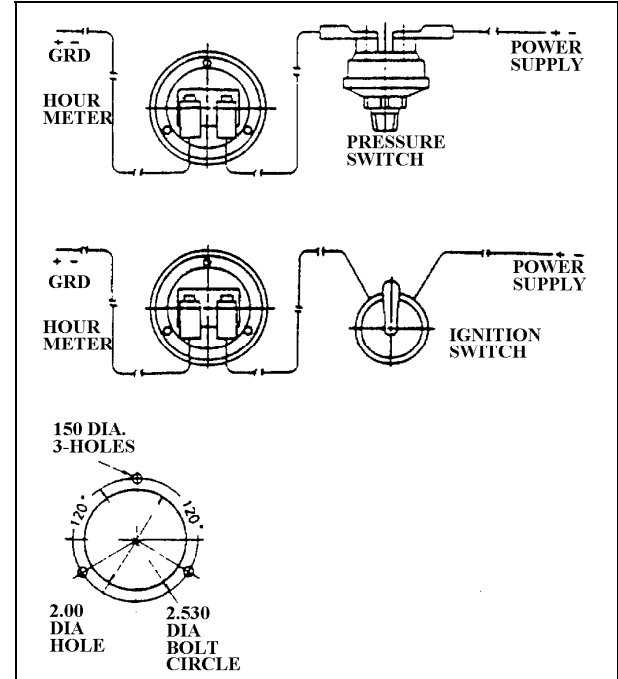

Connecting Meter by Other Methods:

For battery powered ignition systems, connect one wire to any convenient point on the engine or vehicle frame. Connect the other wire to the ignition switch.

Information:

This meter has been designed to withstand vibration, however, it should preferably be mounted in a location where there is a minimum amount of vibration, such as an instrument panel. Where excessive vibration is encountered, a vibration damper should be used. A damper designed for this meter is available.

On magneto ignition systems, the pressure switch must be used. In normal operation, the meter may continue to operate for a short time after the power is turned off. For standard meter use, cut out and bolt circle as shown. For a clamp mounted meter, use a 2.00" diameter hole only.

ISSPRO Limited Warranty

ISSPRO, Inc. warrants to the consumer that its hourmeters will be free from defects in materials and workmanship for 12 months following purchase by the end user or for 2,000 hours, whichever occurs first. Warranty is limited to repair or replacement (at ISSPRO's option) of defective parts within the warranty period. Parts must be returned prepaid to the original purchase point for warranty inspection. This warranty does not apply to ISSPRO products that have been altered in any way or subjected to misapplication, misuse, negligence, or accident.

This warranty is in lieu of any other expressed or implied warranties, including any implied warranty of merchantability or fitness for particular purpose, and of any obligation on the part of the seller. In no event will the seller be liable for incidental or consequential damages.
